- **ICT@mm, 2009-2010:** Hardware Engineering & System Maintenance (2009), Network / Internet Engineering, Administration & System Development (2010).
- **UNFPA & Myanmar Medical Association, 2009:** Training of Trainers for Peer Education, Youth Leadership Development.

Career Focus and Objective

My career has focused on high impact practice and education in cyber security starting with my self-study processes. Effective cyber security requires science, engineering, business, policy and people skills. My goal has been and is to instill this culture in the discipline and provide leadership in all elements.

Cybersecurity professional with a strong interest in ethical hacking, penetration testing, vulnerability analysis, and network security. Hard-working, energetic, personable, and technical-minded individual. Possess exceptional customer service and communication skills with the strong ability to multitask and resolve issues quickly. Currently in a cybersecurity role where I continue to develop and learn new abilities while contributing to the overall success of the organization. I also possess:

- Experience in scripting languages including Python and Bash
- Excellent task management. Ability to handle multiple projects simultaneously
- Experience with security toolkits such as Kali Linux, Metasploit, and Burp Suite Pro.
- Proficient in translating information from technical to executive/management terminology

Professional Recognition

- **DEF CON CMD+CTRL Cyber Range Event, 2021:** DEF CON CMD+CTRL Cyber Range Event on Security Innovation. Awesome challenges and learn more about red teaming knowledge. I'm rank 18 out of 59 competitors.
- **Red Team ICMCP's Scholarship Training Program, Sponsored by Google, 2021:** I was awarded a 6-month Red Team Jumpstart Training program. This scholarship is for offensive cyber security phase 1 training (Red Team) provided by Security Innovation over a three-month period. I won first place in the CTF competition of the Scholarship.

University Recognition

- **American Council of Education, 2020 onwards:** Cyber Incident Analysis and Response (AWR169), Information Risk Management (AWR177), Disaster Recovery for Information Systems (AWR176).

LinkedIn Recognition

- **Franklin Marin**
Cyber Security Professional
- It was a real pleasure to work together with Aung Thu Aye, who was an efficient cyber security engineer. He understands complicated matters even when outside of his direct area of expertise. For Aung Thu Aye the job is obviously the most important thing to do. His performance at Red Team Training sponsored by Google was golden. He is ready to deal with difficult situations and solve the problems on time. He always takes care of the job. Aung Thu Aye always maintains very good relation with teammates. I enjoyed working with him on the various Red Team Training projects we took on.
- **Wai Yan Phyo**
CISSP
- I have noticed Aung Thu Aye is very eager to learn information security and cyber security related things since I started working in MAB IT department together with him. Although he is working in channel team, he never stop learning emerging cyber security techniques, vulnerabilities, risks. As far as I know, he attended and completed some cyber security related online short courses (Phishing Countermeasures, Cyberwarfare, NSA Day Of Cyber etc...) and also self-studying some industrial certifications like CEH and OSCP which he planning to take soon. I believed if he keep studying and learning cyber security related matters, he will be a valuable asset for every organization to hire as a IT security professional.
